20
21 public class MainActivity extends AppCompatActivity {
22
```

نروح ع ملف الجافا عندك وننسخ هذا الاسم

1

## Register app

Android package name ?

com.example.myapplication103

نلصلق الاسم هنا

App nickname (optional) ?

Freemium Android App

Debug signing certificate SHA-1 (optional) ?

00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00:00

Required for Dynamic Links, Invites, and Google Sign-In or phone number support in Auth. Edit SHA-1s in Settings.

Register app

ثم نضغط ->

## Register app

Android package name: com.example.myapplication103

نحمل الملف ونزوح على  
مكان اللي انحفظ فيه  
ونسوي له نسخ

2

## Download config file

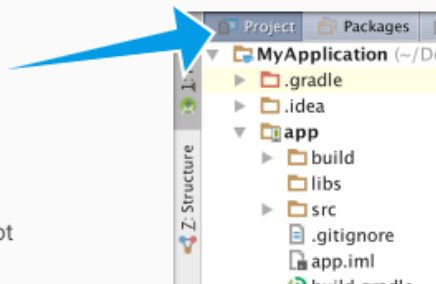

Instructions for Android Studio below

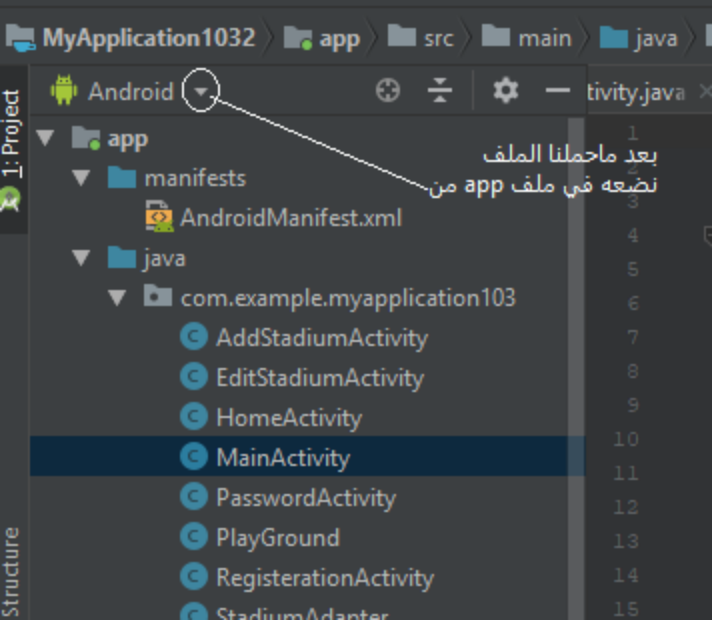

Download google-services.json

Switch to the **Project** view in Android Studio to see your project root directory.

Move the google-services.json file you just downloaded into your Android app module root directory.
